### Opis produktu

#### BirdDog OG4

##### **OG4. The World's First NDI® openGear card**

BirdDog OG4 is the world's first NDI® openGear card. OG4 features four independently configurable 12G SDI inputs and outputs. Full Dashboard support is included along with SFP+ port for 10GbE connectivity.

##### **OpenGear oGx frame compatible**

OG4 is fully compatible with the 4th generation of the openGear® platform, oGx. openGear is an open-architecture and modular 2RU rack frame system that allows for OG's from various manufacturers to live together in the same frame in total harmony.

##### **Professional Cooling. Professional Power**

openGear frames include integrated cooling fans to provide maximum cooling for all cards and can be configured with dual, redundant power supplies for maximum reliability and uptime.

##### **Dashboard**

BirdDog OG4 offers full support for Dashboard, the freely available unified control software for MacOS, Windows, and Linux.

##### **SFP+ for 10GbE & long range**

Industry standard SFP+ connection allows for short, medium, and long-range connections over fiber and supports Ethernet protocols from 1GbE to 10GbE.

##### **Encode & Decode up to 4Kp60**

With support for all resolutions up to 4Kp60, including all HD resolutions, Encoding and Decoding 4K Full NDI® has never been easier. OG4 supports up to 4x channels of 4Kp60 Encode and 2 channels of 4Kp60 Decode. Of course, OG4 supports 4 channels of 1080p60 decode.

##### **Independent Channel Control**

Each channel has independent control of frame rates and resolutions so you can mix and match. Set channel 1 to 4Kp60 and channel 2 to 1080i50. Firmware supports all Encode or all Decode.

##### **Features:**

- NDI® openGear card
- Four independently configurable 12G SDI inputs and outputs
- Integrated cooling fans
- Can be configured with dual, redundant power supplies
- SFP+ for 10GbE & long range
- Encode & Decode up to 4Kp60
- Independent Channel Control
- OpenGear oGx frame compatible
