Opis produktu

SmartView 4K is the world's first full resolution rack mount Ultra HD broadcast monitor with 12G-SDI for native display of up to 2160p60. You get a professional broadcast monitor that supports the latest Ultra HD resolutions, plus automatically switches to SD and HD-SDI formats using high quality Teranex processing for a clean and professional display. The machined metal design includes a built in control panel for using features such as the built in 3D LUTs, H/V delay, blue only, customizable frame markers and more, either from the front panel or via external Ethernet! SmartView 4K supports VESA mounting so you can install on articulated monitor arms or rack mounting.

Features:

- Full resolution Ultra HD broadcast monitor
- 12G-SDI for SD, HD and Ultra HD support up to 2160p60
- Extremely bright display with wide viewing angle
- Advanced broadcast features like 3D LUT support, H/V delay, blue only, adjustable frame guides and more
- Ideal in broadcast studios or on set
- SDI Video Input: 2 SDI inputs automatically switch between SD, HD, 3G, 6G and 12G-SDI. Reclocked loop through output
- Optical Video Input: SFP Optical Fiber connector cage
- SDI Video Output: Automatically switches to input selection
- Auto detection of 4K, 2K, HD or standard definition inputs
- Ethernet: Gigabit ethernet with loop through.
- Tally: 9-pin D connector
