## Opis produktu

**Blackmagic Design SmartScope Duo 4K**
Dual 8" 3 RU SDI/HD-SDI/3G SDI monitoring with built in scopes for technical waveform monitoring.

SmartScope Duo 4K looks like a SmartView Duo but adds independent waveform monitoring so you can select between waveform, vectorscope, RGB parade, YUV parade, histogram and audio phase level displays. Each monitor is independent so can display any combination of scope or picture view!

The SmartScope Duo 4K model includes built in waveform monitoring when you need to analyze image quality more accurately than simply looking at the picture! You get seven of the most popular scopes most widely used in broadcast and post production facilities. Scope displays include waveform, vectorscope, RGB parade, YUV parade, histogram, audio phase and level scopes, and of course you can simply select to view the video itself! Now you don’t have to guess what your video and audio levels are, you can monitor them with precision using SmartScope Duo 4K

**Key Features:**

- Broadcast Accurate Waveform Monitoring
- Waveform Display for Alignments
- Vectorscope View
- Parade Display for Colorists
- Audio View For Monitoring Levels
- Histogram For Location Shoots
