Opis produktu

FORTINGE NOA Tablet Prompter

The **Fortinge NOA Tablet Prompter** features a 70/30 beamsplitter glass providing good contrast, while transmitting most of the light to your camera's lens. It supports DSLRs, mirrorless, and small ENG cameras weighing up to 5.5 pounds. The camera plate is height adjustable to center your camera, and it rides along the support rods allowing you to snug the camera up to the hood. The prompter has an 11.5' reading range for your talent.

The prompter can be used as a traditional prompter, or you can adjust the angle of the tablet holder, up to 90°, which will place the tablet under your camera's lens and transform the prompter into a talent monitor. The prompter mounts to your tripod, and the support rods provide the structure to support the tablet clamps, hood support, and camera plate. Toolless assembly makes it easy to set up and break down.

The prompter features a 70/30 beamsplitter glass for a clear and bright image, and it has an 11.5' reading range for your talent

Using your tablet as the prompter's monitor allows you to use your choice of compatible software

Your tablet's built-in Bluetooth connectivity allows you to control your prompter from a Bluetooth mouse and keyboard
