Opis produktu

LiveText 2.5 Upgrade Coupon Code

The must-have companion application for fast-paced, graphics-heavy, or data-driven productions, LiveText lets you share the workload with standalone title creation and operation.

Build and edit titles on the fly to send to TriCaster over the network in real time. Prepare custom graphics packages offline and export for use with upcoming projects. And make your presentations pop with live lower thirds, OSBs, logo bugs, full-page graphics, scrolls, crawls, and more.
