### Opis produktu

#### Magewell Ultra Encode HDMI Plus

##### A Flexible & Universal 4K Streaming and Recording Encoder

The Ultra Encode HDMI Plus can encode at resolutions up to 4096x2160 at 30 frames per second from its HDMI interface. This model support multiple video encoding formats and technologies - including H.264, H.265 (HEVC), NDI HX2 and NDI HX3 - and a wide array of streaming protocols including RTMP, RTMPS, SRT, RTSP, RTP, HLS, and TVU's ISSP technology.

- Live streaming and recording with support for H.264, H.265, NDI® HX2 and NDI® HX3
- Flexible choice of streaming protocols including RTMP, RTMPS, SRT, HLS and more
- Control via web interface or optional Control Hub centralized management software

Magewell

Magewell was founded in 2011 as an R&D center and manufacturer of video capture devices. We have been breaking boundaries ever since, expanding our technologies to live streaming, encoding and playout as well as embedded systems for video processing. Our solutions are widely deployed around the world for applications including live streaming, broadcast production, video conferencing, lecture capture, medical imaging, security, machine vision, gaming, virtual reality production and many more.

In addition to empowering end-users, our products are also incorporated into a wide range of third-party solutions on an OEM basis by other industry-leading manufacturers. Our products are available globally through our valued channel partners including distributors, resellers and systems integrators.
