Opis produktu

Magewell USB Fusion

USB Fusion is a multi-input USB video capture device with integrated source switching and layout control. Offering two HDMI inputs and one USB webcam input, USB Fusion can switch between sources or combine two inputs simultaneously into one output (picture-in-picture or side-by-side) for capturing into popular software via its USB 3.0 interface.

Make your online lectures and virtual events more engaging. Our USB Fusion hardware lets you combine camera and wired screenshare inputs into attractive live presentations for remote education, webinars, live streaming, video conferencing and more.

- Supports two HDMI inputs and one USB webcam input up to 1080p at 60fps
- Switches between sources or combines two simultaneously into one output
- Companion tablet app for more advanced features

Capture and Combine
USB Fusion is a multi-input USB video capture device with integrated source switching and layout control. Offering two HDMI inputs and one USB webcam input, USB Fusion can switch between sources or combine two inputs simultaneously into one output (picture-in-picture or side-by-side) for capturing into popular software via its USB 3.0 interface.
