### Opis produktu

#### Marshall Electronics CV-RCP-V2 | Camera Control Unit for Marshall Pro-Series Cameras with 5" Touchscreen

The **Marshall CV-RCP-V2 Touchscreen Multi-Camera Controller** provides control of up to seven cameras via a 5" touchscreen panel and two fine-tune control dials. The CV-RCP-V2 is pre-programmed with control protocols for all Marshall broadcast cameras plus select popular cameras from other brands.

Use this compact unit to conveniently adjust, paint, and match your cameras from a control room or broadcast truck. The CV-RCP-V2 employs readily available 3-pin XLR cables for distances up to 1000' and can be converted to fiber for extended distances. Cables are not included with the controller and must be sourced separately.

Your camera settings can be adjusted individually or applied globally without the OSD menu appearing in your video feed. Choose your settings via the touchscreen panel, then use the two dials for on-the-fly fine-tuning. Controllable parameters include exposure, white balance, gamma, black levels, and more. To speed up your workflow, the CV-RCP-V2's interface offers favorites settings, save features, self-help dialogs, and smart menus/sub-menus.

Housed in a sturdy aluminum case, the Marshall CV-RCP-V2 controller runs on either the included AC adapter or on 12 VDC power. Its USB port can be used for saving presets to a memory stick or for firmware updates.

#### Features:

- 5" Touchscreen Camera Controller
- For Marshall Broadcast & Other Cameras
- Control up to 7 Cameras
- Adjust, Paint & Match Cameras Remotely

### Specyfikacje
