Opis produktu

The NewTek™ 4-Stripe Control Panel

The NewTek™ 4-Stripe Control Panel is the core of your real-time video operations, the tactile interface that connects you to the systems, devices, software, and sources that form your interconnected production environment. Meticulously crafted for performance and style, it combines the comprehensive functionality, precision controls, premium hardware mechanics, and ergonomic design that operators demand with the visually arresting aesthetic that executives covet. Paired with the Video Mix Engine over your network, the 4-Stripe Control Panel delivers consummate control of the modern video ecosystem and enables operators to approach even the most demanding productions with absolute confidence.

NewTek 4-Stripe Control Panel Definitive control for the most demanding IP production ecosystems. The pinnacle of control for large-scale interconnected production environments, the NewTek 4-Stripe Control Panel lets you command multi-source, multi-system, and multi-site productions with absolute confidence.

- Intuitive layout mapped to the Video Mix Engine user interface
- IP-based connectivity, with support for multi-engine control over the network
- Responsive, multi-bus operation with independently assignable control stripes
- Practical lighting, variable T-Bar illumination, and dynamic LCD label displays
- Precision controls for expert handling of real-time video operations
- Premium craftsmanship for optimal performance, ergonomics, and style

NewTek 4-Stripe Control Panel is compatible with VMC1 and TriCaster TC1.
